

COMMUNITY PROGRAM: LET’S AIM FOR SUNNAH (ARCHERY)

On January 12, 2024, Group 1 of the Archery Course (CSD1032) organized a program with various activities at the Archery Field of the Pusat Pembangunan Kemahiran Insaniah (PPKI), located near the second gate of Universiti Sains Islam Malaysia (USIM).

Participation was open to all USIM students, and 30 graduate students were appointed as committee members to run the program. Registration was conducted through a Google Form, successfully gathering 30 participants for the program. The main objective of this program was to expose students to the history of archery in Islam and Malaysia. Additionally, the program aimed to foster an interest in archery among participants and provide an opportunity to explore a new hobby.

The program began with a briefing by Sister Iqlima, the deputy director of the program, to give participants an overview of the upcoming activities. As usual, a stretching session was conducted before starting the activities to prevent any injuries. After the stretching session, participants were divided into six small groups and guided by several committee members appointed as facilitators.

The program consists of exploring activities where exhibitions were set up and accompanied by quizzes for the participants. Each exhibition served as a checkpoint that collected points for participants to determine the winning group. Additionally, participants were given the opportunity to practice archery during the demonstration activity, supervised by their respective group facilitators.

At the closing ceremony, a speech of thanks and appreciation was delivered by Sister Dinie, the program director, followed by a prize-giving session for participants who achieved first, second, and third places. The program ended at 1:00 PM with a photography session with participants, committee members, and the program advisor, Ts. Dr. M Norazizi Sham Mohd Sayuti. The program was successfully conducted and received positive feedback from the participants.
